

722 19th Ave SW

BEFORE

AFTER

Project Goals:

1. It was important to the Homeowner that they find a Contractor they could trust.
2. Innovative Design ideas for an open floor plan.
3. A new larger Kitchen was the central focus of the Remodel.
4. Using Quality Products and Materials installed with the highest level of Craftsmanship.

Directions: Take 6th Street SW 1 block west from Hwy 52; turn right on 7th Street SW, go 1 block; turn left on 19th Avenue SW, 1 block to end of the cul-de-sac. Home on your left.

This home began as a standard 70's colonial. Lots of walls, unused spaces and outdated finishes. We created a new open floor plan, relocating the Kitchen and Dining Room and turning the unused Living Room space into a Sitting Room, Butler Pantry and Half Bath. The Foyer and Stairway were opened up and the Mudroom was recreated. Our attention to details and the quality of our work shine in this home. Come see why our projects are consistently the best and the Integrity we add to every project.
